

BOTTLEWASH ADDITIVE

ABSTRACT OF THE INVENTION

An alkaline bottlewashing concentrate effective for removal of mold and

5 for protecting polyethylene terephthalate containers including at least one
cleaning/protecting surfactant which is a C₄ to C₂₀ alkyl diphenylene oxide disulfonate,
an ethoxylated alcohol sulfonate, an alkyl polyether phosphate ester, an aryl polyether
phosphate ester, an alkylaryl polyether phosphate ester, a polycarboxylated ethylene
oxide condensate of a fatty alcohol, or a mixture thereof. The cleaning composition is
10 compatible with polyethylene terephthalate.
